Disposal of a single-use ready-to-use solution for the hip

Annonce V67932 mise à jour le 09/01/2023

Description générale

Désignation de l'actif

Type d'actif	Fonds de commerce
Localisation	Ile-de-France
Département	Confidentiel

Description du fonds de commerce à vendre

Polymere (code name of the project) is a company that specializes in the design, manufacture and marketing of sterile, ready-to-use, single-use orthopedic medical devices. It is one of the world leaders.

Polymere has developed a single-use femoral plate technology (HIP project) combined with a ready-to-use instrument kit for hip surgery. This new technology is at an advanced prototype stage.

Ultimately, the solution will be marketed directly and/or indirectly in the form of a complete kit comprising (i) the implant and (ii) the instruments required for its placement.

The potential market is very large, particularly in the United States.
